

## Product Information: **LIQUIMATIC VG5**

### Description

Liquimatic VG5 is a low viscosity ashless hydraulic oil with antiwear properties. It is blended from highly refined, high quality mineral oils with a balanced additive system that imparts excellent lubricating properties, reduced oil mist and good demulsification properties.

### Features

- Excellent antiwear properties
- Zinc free, ashless additive
- Excellent water separation properties
- Excellent filterability

### Applications

It is ideal for lubricating high-speed zero clearance bearings on grinding machines and other applications, where a low viscosity grade of this type is requested by the original equipment manufacturer.

### Physical Characteristics

Appearance	Green liquid
Relative Density at 15.6 °C	0.841
Kinematic Viscosity @ 40 °C (cSt)	4.88
Closed Flash Point (°C)	126
Pour Point (°C)	-25
Foaming Characteristics (ml)	Seq I 20-0 Seq II 5-0 Seq III 10-0
Water Separability (mins)	5
Acid Number (mgKOH/g)	0.1 max
Aniline Point (°C)	90

Figures based on average production values.
