

## Product Information:

# MULTITRANS DX15

## SPECIALISED TRANSMISSION FLUID

### Description

Multitrans DX15 is an advanced automatic transmission fluid, primarily developed for use in Mercedes Benz 7-speed automatic gearboxes. The product has a lower viscosity than previous MB qualified fluids and promotes improved fuel efficiency through the driveline. The product also ensures positive and effective gearshift under a variety of loads and operating conditions.

### Applications

Recommended for the latest generation of MB 7-speed automatic gearboxes, including the 722.9 7G-Tronic.

### Benefits

- Contributes to fuel efficiency
- Ensures positive and continuous frictional control
- Smooth vibration-free operation
- High level of thermal and oxidative stability
- Excellent shear stability characteristics that maintain system pressure
- Reduced fluid loss through due to low volatility

### Performance Levels

MB 236.15

NAG2FE

Note: This product is not compatible with previous MB specifications.

### Physical Characteristics

Appearance	Blue
Viscosity @ 100°C, cSt.	4.3
Viscosity @ 40°C, cSt.	17.0
Density at 15.6°C	0.848
Flash Point (Open) °C	180 min.

Figures based on average production values.
