

Product Information:

SPORT ACTION 2

2-STROKE ENGINE OIL

Description

Sport Action 2 is a race developed two stroke lubricant incorporating fluid technology developed from experience gained in motorcycle racing. This grade is synthetic and provides maximum film strength and anti-wear characteristics, even under shock load conditions that can be experienced in competition use. The lubricating film is strong enough to prevent engine lock up in moments of temporary overheating.

Sport Action 2 uses advanced anti-wear chemistry to protect all the critical components of the engine, including main and big end bearings, gudgeon pins, rings and bores. Sport Action 2 burns extremely cleanly and not only produces minimal white smoke, but virtually eliminates deposits on spark plugs, even if an over-rich mixture has been inadvertently used.

Applications

Sport Action 2 has been formulated for use in two stroke engines and maybe used as a pre-mix or in oil injection systems. Recommended for motorcycles used in the competition arena, including circuit racing, road racing and off-road.

Performance Levels

API TC
JASO FC

Physical Characteristics

Appearance	Red liquid
Density at 15.6 °C	0.868
Kinematic Viscosity @ 40 °C (cSt)	64.70
Kinematic Viscosity @ 100 °C (cSt)	10.0
Viscosity Index	139
Closed Flash Point (°C)	100

Figures based on average production values.

Part No.s: SAT001, SAT004
